Be part of your safety culture

Use these five safety tips to be an active part of safety at your organization!

- **Keep your eyes up!** Walking while on your phone can lead to a potential slip, trip, or fall that could harm you or others around you.

- **Situational Awareness** Be aware of your surroundings! Especially cluttered environments with trash, boxes and cords.

- **200% Accountability** It's on all of us to speak up about safety. Positively recognize your colleagues who raise concerns!

- **Know your PPE** Make sure to have the appropriate Personal Protective Equipment (PPE) ready and available for any situation.

- **Safe Lifting** Having the necessary equipment ready when lifting or re-positioning patients can make the difference in preventing injuries.
